International Complications Threaten as Result of Shanghai Attack

Antiforeign Feeling Still Runs High; Rebellion Move is Scouted

WASHINGTON, June 15.—Wil-am W. MacKenzie, an employee of the electric department of the Shanghal City Council, killed by Chinese on the Great Western Road last night, was a British sub-ject, as is Miss Mary Duncan, who was slightly wounded at the same

time.

Miss Duncan, telling of the killling of her companion, said:

"We encountered seven Chinese,
dressed like coolies, who stopped
us near the Great Western Road

they wanted and they laughed, at
the same time turning flashlights
upon us. MacKenzie alighted and,
speaking in both English and Chinese, ordered them to leave. One
of the Chinese fired and McKenzie

The killing of MacKenzie and the wounding of his companion, Miss Duncan, promised to shift the center of interest in the disorders in that country back to Shanghai from Canton, although official word of the new and more serious antiforeign outrage was still lacking. It seems certain that the wanton attack on noncombatant fortegers will be made the basis of action by the Peking diplomats of the British government.

The Peking Legation, it was said here, will be sure to move quickly in demanding action by the Chinese central government, if the attack was made in the territory policed by Chinese authorities. Even if it took place within the international settlement, where foreign police are in charge, it was thought representations will be made at Peking with the evil effects of its policy in championing the rioters at Shanghai pointed out to the provisional government.

Under the Kruttachnitt directorship, the Southern Pacific grew in twelve years from a road of 10.000 miles, with annual earnings of \$143,000,000, to 16.000 miles, and earnings of more than 3300,000,000, placing it third in the list of national carriers. He was reputed to be one of a group of half a dozen executives whose annual salaries exceeded \$100,000 annually.

# LIFE IS RECORD OF RAIL ACHIEVEMENT

At the time of his retirement last May as executive head of the Southern Pacific Company, Julius Kruttschnitt was recognized as in the front rank of railroad chiefs.

Krutschnitt was recognized as in the front rank of railroad chiefs, both as an executive and constructor, in the United States.

He was identified in a marked degree with the growth and expansion of the Southern Pacific system.cand the upbuilding of the Pacific dynd Western States through which its lines were constructed.

Born in Ne worleans, July 20, 1354, Krutschnitt, after studying civil engineering at Washington and Lee University, became connected with the Morgan Louisiana and Texas Railroad and Steamship Company as assistant engineer between Morgan City and La Fayette in Louisiana and showed such an aptitude for railroading, especially construction work, that he soon won advancement. He also at this time made a reputation as a disciplinarian in handling men and for railroad tidiness." Under his direction the Morgan line became noted for its tidiness and thorough service to patrons.

ough service to patrons.

MEETS HUNTINGTON

In 1893 Kruttschnitt first met
Collis P. Huntington. president of
the Southern Pacific, who at that
time had just acquired control
of the Morgan line. Huntington
immediately recognized the exceptional ability of Kruttschnitt and
made him first assistant chief engineer and roadmaster of the
Southern Pacific Company and
then within a few months chief
engineer and superintendent.

In 1895 Kruttschitt was ordered
to San Prancisco by Funtington as
general manager of the system.
His influence was immediately felt
through every department of the
western system and his work was
thoroughly appreciated by Huntington.

When Collis P. Huntington died in 1906, E. H. Harriman became the head of the Southern Pacific Company through the purchase of the Crocker interests and it was under Harriman that Krutschnitt achieved some of his best work in railroading. Through his indefatiguable enery and originality of initiative in carrying out big contracts, one of which was the rehabilitation of the old Central Pacific line at an expenditure of \$20,006,000, he was given a free hand in his work 59 Harriman and justified it in every way, so that in 1904 he became a valued member of the "Harriman cabinet" occupying a position of special

REASONS ARE SOUGHT

Secretary Work declared that
"not long ago education was looked
upon as an insurance against the
vicissitudes of life," but "now univensity presidents consult each other to discover reasons for the fallure of the educated."

Secretary Work urged that admittance to colleges and universities should be more exacting, declaring "colleges should no longer
be a possible refuge for the indolent or a temporary retreat for the
defective, but they should be known
as advanced schools for the new
aristocracy of mind and morals to
which intellect and industry are
pre-requisites for admission.

"College neither makes nor mars
boys, it only speeds them on the
way they have already started," he
said, but warning the graduate
that "preparation for life's responsibilities is not made at 4 o'clock
teas, jazy parties at night, or unrestricted social congregation of
the immature."

BROOKS PROMISING

Brooks looks like a most promising ball player. He has a natural swing at the bat and a good eye. He attracted my attention down South some time ago. He also is a good outfielder and fast. To sum it up. Brooks has the apperance of a natural ball player. He will be a big help to the Cube. "Will Freigau continue as good as he looks now?" was nest.
Obviously all I can say to that is that Freigau is a pretty fair ball player and a mighty good man to have around. He will help. The mere fact of getting on a new club will give Freigau new spirit and ambition.

"What about the trade of Gonales is smart as a whip and a good allaround man. I can't understand why, with the work Mike has done in the past two years, St. Louis let him go.

"Do you think Grimm will hit over .3007"

I can answer that question only by saying that Grimm is a great hiter, a good average fielder and should help the club.
"Is the present team, the Cube. stronger now that when it went east, that is, with Brooks, Weis and Freigau in?"

Yes. In fact, I have been a little curious to know what happened to Freiberg. He is a good ball player, a valuable one. I suppose, though, that he had some sort of a slump, like all ball players do at times. All the new men look good and seem to be full of pep. When Marantile gats in and is going at his-usual stride he will be a good balance to the club. I understand he will be back in soon.

"Just what is the matter with the Cube?"

Now, that is a difficult one. Fludying it from a distance, the club seems to be a little off ball. And the first of the club seems to be a little off ball. Soon.

Under further questioning by Deputy State's Attorney Savage. Miss Pope told how her engagement was announced on July I, how they had seen each other morning, noon and night" until Billy's sinal, fatal sinal. She described that illness and how young McClintock had come to her house, his face sushed, and complaining of being ill.

"I told him he must go home,' she said. When he demurred, she drove him home in the car.

Day by day the remarkably self-possessed girl described the events of that illness. On one occasion, when she called, Shepherd drove her home. He said, she testified, that Billy was suffering from serious intestinal troubles and that he was giving him pills to help him.

When the sharp turn for the worst came, Miss Pope continued. Shepherd at times refused to let her in.

# SPECIAL ANNOUNCEMENT

OF THE WELL-KNOWN

# HOUSE OF EVERETT

GENTLEMEN: Owing to these days of unusual business depression, caused through unsettled conditions which are prevalent throughout the entire country, causing a loss to merchants in general, we have come to a full realization, in order to avoid complete stagnation, that drastic measures are an imperative neces.

going to full capacity regardless of what it may cost us in time and labor. We cannot wait for an upward trend of business in general, which, from the present outlook, seems rather remote, and in an effort to stimulate business, we have, after thoughtfully deliberating the matter, decided on inaugurating the greatest value-giving tailoring campaign ever undertaken by a rep utable, long-established tailoring firm, whose unquestioned reputation for integrity and reliability is well known, firmly established and

Under ordinary circumstances and under normal conditions, a campaign of this kind would be given no consideration, as it entails the forfeiting of our margins entirely, as no commercial institution is conducted on the basis of a charitable organization, but the end in view amply justifies the means in the tremendous sacrifice we are about to make in an ef-

fort to stimulate business for the time being. Every promise that has ever been made by the House of Everett has always been made in all sincerity, made in the right spirit and always carried out to the very letter. Hence, as an incentive, in an effort to stimulate business, this \$30,000 stock of high-grade fabrics, which is eded to be one of the largest and most

can fabrics throughout the entire Pacific Coast will be placed on sale and at your disposal during this sale at a tremendous sacrifice. This grade of material is being sold at the present from \$85 to \$70. Every yard of these splendid fabrics, which are of the finest quality and textures, is positively guaranteed to be 100% of the finest pure, long-staple wool obtainable, dyed in the wool and guaranteed to be fast colors.

A personal examination of these fabrics is imperatively essential in order to more thoroughly appreciate the extraordinary extremes we are going to. Several hundred of these styles and patterns and absolute novelties in woolens, entirely exclusive and an utter impossibility to duplicate in any tailoring firm in the city. They involve the latest shades, weaves and designs for the coming season, lately shipped to us direct from the style co ters of the great metropolitan cities of the East, where they are the rage.

The intelligent public is extended a cordial invitation to visit with us, where you can examine these magnificent fabrics at your own leisure and convenience. Every courtesy which naturally due all gentlemen will be extended, regardless of whether an order is placed or not, as we are fully aware of the indisputable fact that courtesy, which doesn't cost any thing, but still means so much in all social and commercial affairs, and which has been the recognized stepping stone that every success ful commercial institution has been founded on, the lack of which no enterprise can exist any length of time, much less hope to accomplish their success.

1000 DIFFERENT STYLES AND PATTERNS TO SELECT FROM - EVERY KNOWN WEAVE, SHADE AND DESIGN FOR THE COMING SEASON IS HERE AND AT YOUR DISPOSAL.

GENTLEMEN: We positively guarantee that we'll make to your own individual measure during this value-giving tailoring campaign, out of these high-grade fabrics, a beautifully and strictly highclass hand-costumed, tailored suit for 345 that will be the exact duplicate in style, quality and workmanship of an actual \$65 and \$70 suit made by the most reliable and reputable tailoring firms in the city; the highest grade of imported linings, trimmings and workmanship will be ingrade of imported linings, trimmings and workmanship will be in-stalled in every garment as though the original selling price of \$65 and \$70 had been paid.

Every garment will be superbly and richly tailored throughout by our own force of expert tailoring mechanics, who have been affiliated with us for years and who have State-wide reputations for needle work, which enables them to command salaries far in excess of bank cashlers. Every garment is tailored in our own workshop, admitted to be one of the most modern, thoroughly equipped tailoring work shops in the country, complying with every law as laid down by the

Your garments will be cut and designed by one of America's famous cutters and designers with an international reputation, which doubly insures that the fitting of your sult will be absolutely perfect in every detail. Hence, we enjoy the confidence and patronage of one of the largest and most exclusive clienteles in the city of Los Angeles, which we are duly and justly proud. The confidence and good will of our fellowmen mean far more to us than the accumulation of more

Wheeler, engineer of the United States Bureau of Public Roads in the thirteenth district, comprising New Mexico and Arizona. Federal aid roads in Arizona now are getting 72.3 per cent of their cost from the national government, compared with 61.2 per cent in other States, the distinction being due to the large expanse of governmental reservations. Such Federal-aid roads in Arizona now include 1500 miles, of a gross State road mileage of 21.000.

The most important work is the Phoenix-Prescott highway, via Wickenburg 112 miles long, to be completed this fall, giving a high-gear road that should be negotiated in less than four hours. The Cilfton-Springerville highway also is of importance though of different type, through a rough forested country, with many turns and relatively heavy grades, providing access for Southern Arizona and El Paso to the Northern Arizona highlands and to the Grand Canyon.

Frigidaire electric refrigeration makes you entirely independent of outside ice supply. Winter and summer, day and night, it provides constant, dependable and economical refrigeration.

Without attention, worry or muss, it maintains a temperature always below the point at which foods may spoil. And it provides a dry cold, too, in place of the dampness of melting ice. It keeps food fresher, crisper, juicier. It guards against the development of harmful bacteria—and so it safeguards health.

Frigidaire makes ice cubes for your table and freezes new and delicious desserts-all without inconvenience or extra expense. And it does all of this at a cost lower than what you probably pay now for ice.

There are complete cabinet models of Frigidaire and there are other models with which your present refrigerator can be converted into Frigidaire.

Ask us to tell you more about Frigidaire for your home.

Training Camp Rifle Teams in National Shoot

BAN FRANCISCO, June 15.-Those who attend the citizens nilitary training camps this summer will be given a chance to go to Camp Perry, in September, as members of the C. M. T. C. rife team Candidates for the team will be selected for their ability to shoot a rifle, and competition will be keen.

All branches of the Army of the United States are represented at Camp Perry annually. The Regular Army sends a team from each branch of the combatant service Infantry, Cavalry Fleid Artillery, Coast Artillery and Engineers. Each State sends a national's Guard team and the R. O. T. C. units are represented by a team. Several civilian rifle clubs are always in attandance, which all goes to make up a spirit of friendly rivalry.

In a gathering consisting of the best shots in the country much may be learned about shooting, and the younger and more inexperienced men who are fortunate enough to attend may well profit by what they see and hear. Age is no bar, as last year several trophies were won by a 17-year-old R. O. T. C. boy from Washington.

Investment bankers inclined to take a gloomy view of the trend in new financing are assured by the California Railroad Commission that fears of this kind are unfounded as far as this State is concerned W. C. Fankhauser, the commission's expert in charge of the department of finance and accounts, recently told a group of Southern California bond dealers that the capital requirements of the public utilities alone will call for the continuous issuance of stock and bonds to provide for additions and betterments.

sing Speculative Forces Struggle for Control

Bear Traders Take Advant age of Mexican Trouble

Pan-American Petroleum and Transport Shares Off

NEW YORK, June 15.—Opposing speculative forces struggled for control of today's stock market, causing considerable irregularity in price movements. Trading was in moderate volume. The day's sales aggregated about one and one-quarter million shares.

Bear traders, taking advantage of the Mexican controversy and the apparent difficulty in attracting public participation on the long side, offered stocks freety and succeeded in bringing about recessions of 1 to 5 points in many issues, part of which were later recovered.

Operators for the advance found encouragement in the continuance of easy money rates, the stiffening of nonferrous-metal prices and reports of trade improvement in several of the important industries.

losses were generally held to fractions.

Call money ruled steady at 3 3-4 per cent despite heavy tax day demands. The time money and commercial paper markets were quiet with rates unchanged.

Weakness of Italian lire, which hroke about 6 points to around 1.85 cents, featured the irregular foreign exchange market. The first shipment of gold to Italy since the war, was announced during the day. Demand sterling held firm around 24.81% and French francs were slightly lower around 4.82 cents.

Murderer Concealed Camera to Trick Wife, She Said

Boudoir Pictures Club Over Victim, Father Declares

Greed for wealth led Dr. Thomas naire step-son, Charles Patrick

lionaire step-son, Charles Patrick Grogan, three weeks before he asphyxiated his wife, the boy's relatives declared last night in telling of the plot to murder the youthful heir.

They also told how the suave dentist held his strange power over his wife, whose murder by poison gas he has so cooly confessed after deceiving investigators during their four-months' search for the missing club woman.

By means of a cleverty concealed camera in the privacy of his wife's boudoir, the slayer obtained photographs of his wife in what appeared to be highly unconventional poses.

Only a few days before her murder she sobbed to her father that Dr. Young threatened to distribute the pictures among her friends and ruin her reputation if she separated from him.

DIGAMY TRACED

While the relatives were making the new charges against the murderer, the authorities were uncovering a trail of bigamy left by him, and a coroner's jury was bringing in a verdict accusing him of the murder of his wife whose body was dug out of its concrete tomb in a cistern in Beverly Glen Saturday night.

The reconstructed crime career of the dentist revealed that young Grogan had been marked by his step-father to die by potson and that he was near death for three weeks from the effects of the poisoning. His mother saved his life after his three weeks of agony and, it is the opinion of the investigators, paid for her motherly services with her own life.

BOY TELLS PLANS

Though his young heart is still torn with grief over the grewsome tragedy of which his mother was the victim, he outlined his ewn future yeaterday afternoon. He desires to complete his course of study at the Harvard Military Academy, and during the summer months he plans to take a course in automobile engineering.

Upon graduating from military school, Patrick plans to take a course of studies in the University of California. Completing his studies he intends to enter some law office—not for the purpose of practicing law, but to acquire enough legal knowledge to handle his own affairs. He then plans, at the age of 25 years to plunge into the managing of his estate affairs, which will require all of his time.

Dr. Young spent his early hours last evening reading William J. Locke's "Morals of Marcus Ordeyne," which he requested earlier in the day. He read the book as he in the day. He read the book as he at in his cell at the Beveriy Hills Jail, where Deputy Sheriff White kept a constant watch over him. At \$ p.m., the dentist was visited by Lewis F. Collings, retained by Dr. Young as his attorney. He talked with his attorney for an hour. When the conference was concluded Attorney Collings stated it was too early at this time to announce his client's defense, though it is generally believed it will be an insanity plea.

"I have known Dr. Young for twelve years and he has been a close friend of mine," Attorney Collings stated. "I was his attorney in other cases in which he was involved and, knowing him as I do, this is no time for me to throw him down, even though he admits he is almost penniless."

Baptismal Font Dedicated for Mr. and Mrs. Brodbeck by Methodist Congregation

A six-foot white-marble baptismal font of Italian design with the inscription, "In honor of Dr. and Mrs. H. W. Brodbeck, 34 years our Sunday-school leaders, 1891-1925," chiseled on one of its facades, was dedicated Sunday at the First Methodist Episcopal Church, Eighth and Hope streets, as one of the features of the Children's Day program. The font was donated by the congregation of the church in respect to the untiring efforts of Mr. and Mrs. Brodbeck, through more than three decades of religious work as superintendents of the Sunday-school.

The ceremony, which was a surprice to Dr. Brodbeck and wife, was also featured by the distribution of more than 500 church calendars with their picture on the front. The dedicatory address was made by Rev. Elmer E. Helms, pastor of the church. A message from Bishop Charles E. Locke, former pastor, lauding the work of Dr. Brodbeck, was also read to the congregation. The font was unveiled by the two grand-daughters of Bishop Locke, the Misses Mary Lucile White and Nancy Jane Thompson.

So obvious have been the ill effects of essive Federal tax rates that the people had little need to be told by Undersecre tary Winston of the Treasury Department that such rates cripple the country finan-cially. Some of the members of the Nayawaed behind their programs when they heard that part of his recent speech at Washington. What, however, was less in the nature of platitude was his reference to how industry was being diverted into wasteful channels as a result of high income taxes, which imposed artificial restraints upon business. The credit men must have appreciated keenly this forceful passage in Mr. Winston's speech:

We want a highway of taxation which makes it cheaper and quicker for the business man to go straight through to success rather than to take the long way round in the effort to avoid the government's toll of excessive tax.

Senator Smoot, chairman of the Senate Finance Committee, predicts further tax re-vision by Congress at its next session. He says that income taxes probably will be reduced by at least \$350,000,000 at that session and that an effort will be made to reduce taxes on small incomes.

A glance at our financial history during

recent years shows how the reduction of income taxes has been made possible. Four years ago President Harding signed the Budget and Accounting Act, and Gen. Charles G. It has been learned that a roadhouse near partiments and establishments of the government spent more than \$70,000,000,000 and nobody knew how much of this vast sum was loss or waste. AN ODE FOR POET'S DAY (A little late.)

The poet plies no useful trade; Such wealth as he may have is made By sitting idly in the shade, And with serene enjoyment Inditing odes to put in books, On violets in sheltered nooks, mossy stones, near rippling brooks; Not much of an employment!

He makes no clothes; he makes no shoe Nor even writes the ragtime blues Which serve the public to amuse
When heard in the theayter.
The man who pens this sort of lay,
And gets for it a lot of pay—
The poet has the nerve to say
Is but a seventh rater!

Were poets neither made nor born.
We should not with despair be too
Or feel especially forform—
But what a mournful nation
We'd be if these jazz-writing boys
Did not supply abundant joys,
As well as good loud honest noise
With peppy syncopation.

Whoever says the poet's great, and thinks we ought to celebrate His fame upon some given date
Must be an awful dumb one!
If it must be our end and aim
To celebrate somebody's fame. Let's pick a guy that's got a name Like old Babe Ruth or some one

A Contented Veteran

LOS ANGELES, June 11.—[To the Editor of The Times:] I have just read in today's issue a letter signed "Frank W. Smith, a Spanish War Veteran," in which complaint is made on behalf of the Civil War veterans at the way they are treated compared with the veterans of the World War. As one of the Civil War veterans I want to repudiate his complaint. Uncle Sam has always dealt with us liberally, even generously, and we have no reason for complaint.

In 1861 I entered the Thirty-ninth Illinois and was sent east and was with Sherman's army at Savannah so I know something of the hardships. I am a member of the Home at Sawtelle on furlough and know the veterans there are provided every attention and comfort, good food, clothes, hospital and doctor's service, then \$50 per month pension and many \$72. What more in reason could one ask?

Haif-Cent Pieces
WHITTIER, June 10.—[To the
Editor of The Times:] Mr. Haskin's dispatch in yesterday's Times
about half-cent coins is interest-

ing.

The haif-cent coin would probably be a nuisance. Look at the various articles being sold with signs "15 cents, two for 25," "20 cents, two for 35," etc. and one gets some idea of how dealers try to make the larger sales. The bakers would not be considered as profiteering if they sold bread at "3, two for 15," "11, two for 20," etc. If we must have a fractional coin let it be a 2½-cent piece.

F. L. MORGAN.

An Australian Visitor

LOS ANGELES, June 9.—[To the Editor of The Times: Mr. Allan, who says he has lived for twenty years in Australia, has some erroneous ideas about the country, especially when he talks of having to do business with cities that are 400 to 700 miles apart and poor roads or no made roads between these places. And no one to see but an occasional black bushman or old man kangaroo. Old men kangaroos and black bushmen disparents.

or old man kangaroo. Old men kangaroos and black bushmen disappeared long before Mr. Allan came to Australia.

There are numerous roads and "made roads" as designated by the Auto Club. In the 560 miles between Adelaide and Melbourne there are many towns of from 5000 and Sydney (600 miles from Melbourne) has over 1,000,000. As regards good roads, Sydney compares well with Los Angeles. What really holds travel by auto back in Australia is the fact that gasoline costs 72 cents a gallon and a Ford car \$2000—so outrageous is the duty on these imported triticles. C. N.

Chown, general passenger agent of the Grand Trunk-Canadian National. "First, the unusual wealth of scenery along the road, and second, our belief that there exists a misunderstanding on the part of the public with regard to excess fares. Many business and pleasure travelers, who are fin no great rush, use excess fare trains today because they have interpreted excess fares as an indication of better equipment. As a matter of fact, excess fares are an indication of train time and not train equipment."

This New Way
To Better Health

is winning thousands of thinking people to its support. You, too, can benefit by this natural aid.

ALMOST every sale of a Revigator results directly in the sale of two, three or four others. For those who try radio-active water become enthusiasts.

They see results. They recognize the benefits within an amasingly short period. They tell their friends.

But those quick results mean much more than merely mak-ing friends for the Revigator, as important and gratifying as that is to us.

What Quick Results Mean The almost immediate effects of drinking radio-active water are an indication that the body needs this water. It is contributing something to physical well-being that nature demands.

For radio-active water is nat-ural water. Spring water, taken directly at the spring, is radioactive.

The waters of famous Hot Springs, Arkansas, and other health resorts are radio-active. In fact, except for this radio-activity, they differ, little, if any, from the ordinary hydrant water you drink.

What It Does

Radio-activity in water is simply Nature's method of aid-ing the body to eliminate prop-erly. It helps the bodily organs to discharge those poisons which too often remain to lower vitality and resistance to

It makes people, who are normally well, sounder and stronger.

can Petroleum Co., Los Angeles.
Hon. Chas. E. Curry, Member of Congress, Sacramento, Cal. Arthur Clarkson, Rancho Golf Chub.
Hon. W. Frank James, Member of Congress from Michigan, Washington, D. C.
Hon. Frank Jordan, Secretary of State, Sacramento, Cal.
Bishop John MacGinley, Fresno, Cal. That is the real purpose of the Revigator. It revitalizes water so that everyone in homes and offices may enjoy true, natural water at all times.

A Plus Value Obviously, though this is not

its real purpose, the Revigator frequently benefits people who are not entirely well. The majority of ailments re-sult from improper elimination. Therefore radio-active water, by helping to correct this con-dition, aids hundreds of people to enjoy good health—people who have not known real vigor

and energy for years. One Way

There are but two ways in which you may enjoy the health benefits of natural radio-active water. One way, obviously, is to drink ater directly from springs at Hot prings, Arkansas, or other famous salth resorts.

But radio-active water can not be stored. Even though bottled and sealed hermetically, this important element is lost within a few days.

So stored water will not do. And the water you drink is stored.

The Other Way

The other way is to have a Revigator in your home. For this health jar is lined with radium ore which returns to water placed in the jar, the natural radio-activity.

Fill the jar at night. Drink the water the next day. Thus always enjoy the benefits of radio-active water.

And knowing the experiences of thousands, we are confident that you, too, will see the results of radio-active water within ten days or two weeks.

Send for additional free informa-tion. Enjoy the better health that this product is aiding thousands to enjoy. Mail the coupon or phone today. Or if you prefer, go to the address below and get FREE Radio-active Water for a ten-day trial.

# MAY CATCH

**Landed During Month** 

Southland fisheries brought 2.694,854 pounds of deep-sea varieties to the markets of Los Anrieties to the markets of Los Angeles Harbor during May, according to figures compiled by the Commercial Fisheries Bureau of the State Fish and Game Commission. Fishermen declare the high mark of last month promises a heavy yield for the tuna and albacore season, which opens next week in Mexican West Coast waters.

Barracedda led the more than thirty varieties brought to dock, with a total of 1,387,761 pounds. The close of the sardine season was noted, with an total of 373,512 pounds. The close of the sardine season was noted, with only 6497 pounds of the little fish recorded.

It is estimated that more than 500 offshore fishing craft from this port will be active this season in the tuna catch, starting this month off the lower Mexican West Coast and closing next fall among the northern Channel Islands.

### Henderson to Talk Today at Alexandria

Many a sad story has been written about the difficulties comedy directors have met with in making a dramatic actor do comedy scenes. Comedy has a tempo about nine times as fast-as drama and some artists with broad experience in the dramatic field can't "make the grade" in the pure comedy type of story.

Now it is left to the Hal Roach troupe in which Glenn

Tryon is directed by Fred Guiol, making a new two-reeler of laughs, to handle a problem which is the opposite extreme. F. Richard Jones, director-general, cast Tyler Brooke, the comedian of "No, No, Nanette," recently signed on a long-term contract

They made the trip across the continent for the purpose of learning some new dances under Belcher. Upon their return east the sisters will appear in Keith vaudeville.

Like a number of other Belcher artists in New York and elsewhere, these two dancers have made a decided impression on Gothamites during their appearance at the Hippodrome, and they are now in demand in the metropolis.

Richard Jones, director-general, cast Tyler Brooke, the comedition of "No, No, Nanette," recently signed on a long-term contract by the Roach studios, with Glenn Tryon in the new comedy.

This was Brooke's first work before the camera. Suddenly the safety with mile-a-minute action, had gotten believe to the habit of never pausing, never even slowing a down for a laugh. Instead of being too slow in his actions, as most stage artists, he was miles ahead of the director and clear beyond the script!
